PROJECTS

Orbit – Full-Stack Property Listing Platform | Live Demo | GitHub

- Developed an Airbnb-inspired property listing platform with functionality for property discovery, listing management, and user interactions.
- Implemented authentication and authorization using Passport.js, session management, and protected CRUD operations, ensuring only authenticated users can create reviews and ratings.
- Integrated Cloudinary for property image uploads and storage, and MongoDB with Mongoose for managing property listings, user data, and reviews.
- **Tech Stack:** Node.js, Express.js, MongoDB, Mongoose, EJS, JavaScript, Passport.js, Cloudinary, Bootstrap 5, HTML, CSS.

Samjhao – AI-Powered Multilingual Document Explainer | Live Demo | GitHub

- Built a full-stack document intelligence application that converts complex bills, notices, and agreements into simplified, actionable explanations.
- Integrated Gemini multimodal AI to analyze PDF documents and images, extracting summaries, financial amounts, important dates, action steps, and potential warnings in English, Hindi, and Marathi.
- Implemented JWT-based authentication, bcrypt password hashing, and user-specific document history using MongoDB and Mongoose.
- Designed protected REST APIs for document processing and history retrieval, and deployed the application using Vercel, Render, and MongoDB Atlas.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB Atlas, Gemini API, JWT, bcrypt.js.
